CLEMENTS VISION CARE

optomap®
Retinal Exam

In our continued efforts to bring the most advanced technology to our patients, Clements Vision Care offers the Optomap Retinal Exam as an integral part of your eye health exam.

Many eye problems can develop without warning or symptoms. Conditions such as macular degeneration, glaucoma, retinal tears, retinal detachments, diabetes and high blood pressure can be detected with a thorough examination of the retina.

An Optomap Retinal Exam provides:

- A permanent picture of the retina, providing the largest view of the retina possible without dilation. This will help to confirm a healthy eye and/or aid in the detection of disease.
- **An alternative to pupil dilation in most cases. It is <u>HIGHLY</u> recommended for patients who do not wish to be dilated at the exam.** Dilation may still be necessary if certain eye conditions are discovered.
- Patients who have been diagnosed with Borderline, Type I, or Type II Diabetes are required to be dilated on a yearly basis.

The Optomap Retinal Exam fee is: **$36.00 – (Previous Patients)**
$27.00 – (New Patients)

The fee is not covered by insurance and is payable at today's visit.

Please let us know your preference by checking one box below:

☐ Yes, please perform Optomap Retinal Imaging

☐ I do not wish to have Optomap Retinal Imaging performed
